

LAVA® BASIC - DM - The ideal solution for heating from the ceiling.

USE

The already proven LAVA® BASIC - DM is suitable for heating from the ceiling, for example, for discreet heating in living areas, offices, bathrooms, schools, containers, etc. LAVA® BASIC - DM is a 22 mm flat infrared radiant heater characterised by its uniform infrared heat and aesthetics.

Mounted on the ceiling or in suspended ceilings, the heaters are ideally suited for full heating or zone heating. When installed in the ceiling, the heat radiator is fully integrated into the ceiling. Ceiling mounting allows optimal use of the area and damage as a result of jolting the heater is avoided. Available in the colour White RAL 9016 and in 5 capacities.

Suspended ceilings

TECHNICAL DATA

- > Voltage: 230 V
- > Output: 350, 500, 750, 1000, 1500 Watt
- > Surface temperature: max. 120 °C
- > Surface: Structured surface, white RAL 9016
- > Device/Installation depth: 22/52 mm
- > Protection rating: IP 21
- > Cable: 1 m, 3 x 1.5 mm² without plug
- > Factory warranty: 5 years

BENEFITS OF THIS PRODUCT

- + Lightweight design - Easy ceiling mounting
- + Large infrared emitting surface
- + Maintenance free and magnetic field free
- + High proportion of radiation
- + 350, 750 and 1500 W suitable for suspended ceilings
- + Also suitable for wall mounting

SELECTION GUIDE

The selection of the output depends on the heat demand of the room (height: 2.5 m) and the heating application.

The following is a guide:

- 20-45 W/m² Low energy and passive house
- 50-70 W/m² Well insulated housing
- 75-95 W/m² Moderately insulated housing
- 100-120 W/m² Poorly insulated housing

LAVA® BASIC - DM, infrared heating with no control
