

SHORT-WAVE INFRARED HEATER - SOLAMAGIC® PREMIUM

SOLAMAGIC® S1 - Premium short-wave heater

Infrared heat IR-A

USE

Design meets technology. A premium radiant heater with uncompromising technology and sophisticated design. The Solastar G heater tube is essentially different from the previous HeLeN tubes due to its light emission.

The newly developed Solastar heater represents a technology which optimally converts the input energy to heat whilst also reducing light emission by over 90 % compared to conventional heaters, creating a particularly pleasant ambience.

TECHNICAL DATA

- > Voltage: 230 V, 50/60 Hz
- > Heating tube: Solastar technology
- > Colours: White, Titanium, Nano-anthracite
- > Special colours: available for surcharge
- > Dip switch: On/Off
- > Protection rating: IP 44
- > Cable: 50 cm with plug
- > Approval: TÜV Nord

SOLASTAR - HEATING ELEMENT COMPARED

Solastar Heizelement - Low Glare less light emission

HeLeN tube

BENEFITS OF THIS PRODUCT

- + Innovative Solastar heating element
- + New quick mounting system
- + Quick clamping binder for fast alignment
- + Soft start function with S1-2000 – reduces the switch-on current
- + Integrated coupling system
- + Modular set-up – extendable with radio controlled – or dimmable module
- + Integrated USB connector for cameras

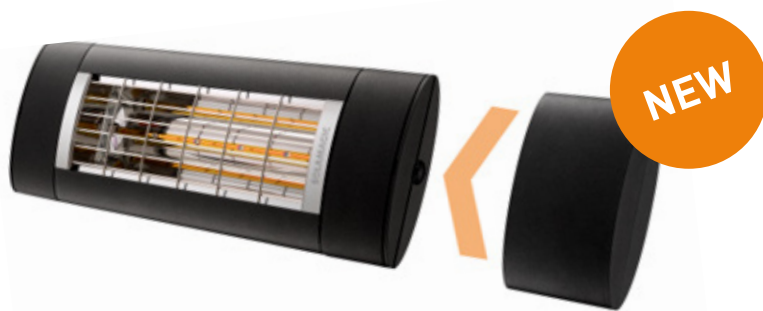

SOLAMAGIC® ECO+ - Short-wave infrared heater
